

VIJAY GHATAGE

3D HARD SURFACE ARTIST

PERSONAL PROFILE

I'm a 3D Artist with over 3 years of experience specializing in high-quality prop creation and vehicle modeling for real-time applications. I have contributed to AAA simulation projects such as Microsoft Flight Simulator. I focus on crafting high-fidelity assets optimized for real-time engines, ensuring both visual accuracy and performance efficiency.

I am highly motivated to complete tasks efficiently and always strive to improve my workflow by experimenting with self-devised tips and techniques. Alongside artistic development, I have a strong interest in technical workflows, tool development, and pipeline optimization, bridging the gap between art and technology in collaborative, high-performance production environments.

SOFTWARE SKILLS

- Maya
- ZBrush
- Blender
- 3DS Max Photoshop
- Substance painter
- Marmoset Toolbag

EXPERIENCE

- Lakshya Digital - 3 Years (2023 - till now)
Role - Jr. 3D Hard Surface
Level 1 Artist

EDUCATION

- Adv. 3D Modeling & Animation (2020 - 2021)
(Creation Multimedia, Kolhapur)

CONTACT

- PHONE:** +91 9767 111 693
E-Mail: ghatagevijay25@gmail.com

KEY SKILLS

- Hard Surface Modeling
- Environment Modeling
- Vehicle Modeling
- UV Mapping & Baking
- Real-Time Optimization
- Material in Unreal Engine
- Game-Ready Asset Creation
- Bug Fixing & Error Resolution
- Developed custom tool scripts for Maya and 3ds Max using AI-assisted development

PROJECT HIGHLIGHTS

- Passionate and detail-oriented 3D Artist with over 3 years of experience, specializing in high-quality prop creation and vehicle modeling for real-time applications.
- Contributed to AAA simulation projects including Microsoft Flight Simulator, EA-FC-26, and 343 Halo, with notable work on vehicles like the Pagani Roadster.
- Worked on diverse environment projects, collaborating with large pipeline teams where each team followed distinct workflows, demonstrating adaptability and strong teamwork.
- Skilled in 3D modeling, texturing, and visual storytelling, crafting high-fidelity assets that balance visual accuracy with optimal performance.
- Excels under tight deadlines while collaborating effectively with teams and clients.
- Mentors colleagues on game pipelines, enhancing team efficiency and knowledge sharing.
- Continuously refines workflow using self-devised tips and techniques to improve productivity.
- Maintains a strong interest in technical workflows, tool development, and pipeline optimization, bridging the gap between art and technology in high-performance production environments.
